

CORPORATE TRANSPARENCY AND INVESTOR RELATIONS

The Group always endeavors to improve transparency and accountability to its Shareholders in the best possible way. The senior management of the Group participates in various investor relations activities including investor meetings, investor conferences and post-results road shows from time to time. These provide the investment community with an opportunity to understand the business of the Group better. The Group actively liaises and carries out high-quality communication with Shareholders and investors via diversified communication channels. After reporting its interim and annual results, the Group holds press conference and investor presentation/conference call where the financial performance, business review and prospect of the Group are presented. This also sets an open communication platform for the Group's senior management to address any questions that the investment community and the media may have. Web-cast presentation is then sent to Shareholders and investors around the world to ensure information is disseminated on a fair and timely basis. The Group issues press releases and announcements where appropriate to provide updated information about the Group's business development in a timely manner. The Group also updates its website regularly to ensure information about its latest development disseminated promptly.

Due to the continued lockdown policy brought by the outbreak of coronavirus disease 2019 in early 2020, the Group's investor relations activities were held via teleconference instead when appropriate. During the Current Year, the Group's senior management attended over 50 investor meetings. This allowed the investment community to understand the business of the Group better. As a result of various investor relations activities undertaken, as at the end of the Current Year, 6 securities companies provided research coverage on the Group.
